

## Stage 1 Meaningful Use Requirements & simplifyMD Status

Core Set - Practice Must Meet ALL of These Criteria	
Criteria	simplifyMD Status
Record patient demographics (sex, race, ethnicity, date of birth, preferred language, and in the case of hospitals, date and preliminary cause of death in the event of mortality). More than 50% of patients' demographic data must be recorded as structured data.	✓
Record vital signs and chart changes (height, weight, blood pressure, body mass index, growth charts for children). More than 50% of patients 2 years of age or older must have height, weight and blood pressure recorded as structured data.	✓
Maintain up-to-date problem list of current and active diagnoses. More than 80% of patients must have at least one entry recorded as structured data.	✓
Maintain an active medication list. More than 80% of patients have at least one entry recorded as structured data	✓
Maintain an active medication allergy list. More than 80% of patients have at least one entry recorded as structured data	✓
Record smoking status for patients 13 and older. More than 50% if patients age 13 or older have smoking status recorded as structured data.	⌚
Provide patients with clinical summaries for each office visit; for hospitals provide an electronic copy of hospital discharge instructions upon request. Clinical summaries provided to patients for more than 50% of all visits within 3 business days.	⌚
Generate and transmit permissible prescriptions electronically (does not apply to hospitals). More than 40% must be transmitted electronically using certified EHR technology.	👉
Computerized Provider Order Entry for Medication Orders. More than 30% of patients with at least one medication in their medication list must have at least one medication ordered through CPOE	👉
Implement drug-drug and drug-allergy interaction checks. Functionality must be enabled for these checks for the entire reporting period.	👉
Implement capability to electronically exchange key clinical information among providers and patient-authorized entities. Must perform at least one test of the EHR's capacity to electronically exchange information.	👉
Implement one clinical decision support rule and track compliance with that rule. One rule must be implemented.	⌚
Implement systems to protect privacy and security of patient data in the EHR. Must conduct or review a security risk analysis, implement security updates as necessary and correct identified security deficiencies.	⌚
Report clinical quality measures to CMS or states. For 2011, provide aggregate numerator and denominator through attestation. For 2012, electronically submit measures.	⌚

Menu Set - Practice Must Choose 5 of the 10, one of which is indicated with *	
Criteria	simplifyMD Status
Implement drug formulary checks. Drug formulary check system must be implemented and access at least one internal or external drug formulary during the reporting period.	👉
Incorporate clinical laboratory test results into EHRs as structured data. More than 40% of clinical laboratory test results are in positive/negative or numerical format and are incorporated into EHRs as structured data	⌚
Generate lists of patients by specific conditions for use for quality improvement, reduction of disparities, research or outreach. Must generate one listing of patients with a specific condition	⌚
Use EHR technology to identify patient-specific education resources and provide those to the patient as appropriate. More than 10% of patients are provided patient specific education resources	⌚
Perform Medication reconciliation between care settings. Medication reconciliation must be performed for more than 50% of transitions of care.	?
Provide summary of care record for patients referred or transitioned to another provider or setting. Summary of care record must be provided for more than 50% of patient transitions or referrals	⌚
Submission of electronic immunization data to immunization registries or immunization information systems. Must perform at least one test of data submission and followup submission (where registries can accept electronic submissions) *	⌚
Submission of electronic syndromic surveillance data to public health agencies. Must perform at least one test of data submission and followup submission (where public health agencies can accept electronic data) *	⌚
Send reminders to patients (per patient preference) for preventative and follow-up care. More than 20% of patients aged 65 or older or age 5 or younger must be sent appropriate reminders.	⌚
Provide patients with timely electronic access to their health information (including laboratory results, problem list, medication list, medication allergies). More than 10% of patients must be provided with electronic access to information within 4 days of its being updated in the EHR.	⌚

Legend	
simplifyMD Software Currently Meets Requirement	✓
simplifyMD has Partnered with a Vendor to Meet Requirement	👉
simplifyMD Will Have Requirement Met in SP12 Software Release	⌚
simplifyMD is Awaiting Clarification From Government	?

Our assumptions for functionality and how we will approach the Meaningful Use changes is based on information that was available by the Health and Human Services (HHS) and National Institute of Standards Technology (NIST) on July, 2010. At this time no certification bodies have been chosen and certification bodies have not supplied the industry with their requirements and procedures so the items in this document are subject to change based on new regulatory and procedural requirements.
